

YCxxxPSF 60 M10/2

The best quality p-type mono cells and production process.
Professional technology, reliable quality and power generation guarantee.

Higher Durability

The multi-busbar design can decrease the risk of the cell micro-cracks and fingers broken.

High Power Density

High conversion efficiency and more power output per square meter, by lower series resistance and improved light harvesting.

Half-cell Design

Less energy loss caused by shading due to new cell string layout and split J-box, and lower cell connection power loss due to half-cell design.

Power guarantee

First year attenuation $\leq 2\%$, 2-25 year annual attenuation $\leq 0.55\%$

Large size cell

The large cell design effectively increases module peak power and effectively reduces BOS costs, thereby reducing system costs.
